

# THE MODULE HANDBOOK

## FACULTY OF BIOLOGY

### Phycology

<b>Module code</b>	BID 21002IUP
<b>Module level</b>	3 <sup>rd</sup> year of Undergraduate Program in Biology
<b>Abbreviation, if applicable</b>	-
<b>Sub-heading, if applicable</b>	-
<b>Courses included in the module, if applicable</b>	-
<b>Semester/term</b>	Odd
<b>Module coordinator(s)</b>	Abdul Razaq Chasani, S.Si., M.Si.
<b>Lecture(s)</b>	1. Abdul Razaq Chasani, S.Si., M.Si. 2. Dr. Eko Agus Suyono, M.App.Sc.
<b>Language</b>	English
<b>Classification within the Curriculum</b>	Elective course
<b>Teaching format/class hours per week during the semester</b>	This course is organized into one class and planned to have 14 teaching weeks and 2 weeks of examination.
<b>Workload</b>	Estimated working hour: 10,5 hours/week.
<b>Credit points</b>	2-1 credits
<b>Requirements</b>	Plant Systematics (BIB 21001IUP)
<b>Learning goals/ competencies</b>	<ol style="list-style-type: none"><li>1. Students have the scientific capability covering basic concepts, principles and theories related to phycology.</li><li>2. Students are able to analyze the results and determine the validity and truth in groups or independently.</li><li>3. Students have the ability to use scientific literature and make notes effectively.</li><li>4. Students are able to create and present scientific reports and communicate in accordance with the development of science in Biology.</li><li>5. Students have an attitude of great curiosity, able to appreciate the views and opinions of others.</li><li>6. Students have a responsible attitude in developing phycology creative, innovative and promote ethics.</li></ol>
<b>Content</b>	This course provides an understanding of the phycological science, characteristics of organisms belonging to Algae. Cellular organization: prokaryotik and eukaryotik. Classification, reproduction and life cycles, as well as the morphology of the talus. Algae prokaryotik: Cyanophyta

# THE MODULE HANDBOOK

## FACULTY OF BIOLOGY

	(Cyanobacteria). Algae Eukaryotik: glaucophyte, Chlorophyta, Phaeophyta, Rhodophyta. Nutrition and Environmental Physiology. Sterilization and manufacture of culture media. Isolation and purification techniques. Culture in door and out door. Analysis of growth, biochemistry and physiology. Application and development for the culture and engineering of algae.
<b>Study/exam achievements</b>	<b>1. Theory</b> <ol style="list-style-type: none"><li>Midterm: 40%</li><li>Final examination: 40%</li><li>Assignments: 20%</li></ol> <b>2. Laboratory work</b> <ol style="list-style-type: none"><li>Pretest: 30%</li><li>Group activity: 30%</li><li>Weekly reports: 40%</li></ol>
<b>Forms of media</b>	White board, specimen, computer, LCD
<b>Literature</b>	<b>Text Books</b> <ol style="list-style-type: none"><li>Andersen, R.A. 2005. Algal Culturing Techniques. Elsevier Academic Press</li><li>Lee, R.E. 1995. Phycology.
